

WATER CARE

SILK BALANCE

SPA MODEL _____ GALLONS _____

START UP:

- Once your spa is filled & heated, add 1 TBSP Chlorine Granules. Run Jets for 20 min. Wait overnight.
- Balance Your Water starting with Alkalinity, then checking pH and lastly calcium hardness
- Install your Silver Ion Cartridge
- Pour Silk into the filter area: 3 oz for tubs less than 400 gallons. 4 oz for tubs more than 400 gallons.

RUN THE JETS FOR 10 MINUTES

AFTER EACH USE:

1 TBSP oxidizer for each person (Max 2 TBSP)

WEEKLY:

- Test the alkalinity, then pH and finally Calcium hardness & adjust as needed
- Pour Silk Balance into the filter area according to the dosage for your spa listed on the cap:
- Add 1 TSP of chlorine
- For the first 3 weeks after a refill, rinse your filters weekly (then switch to a once per month rinse!)

MONTHLY:

- Rinse your filters

EVERY 4 MONTHS:

- Drain & Refill your spa
- Replace your silver ion cartridge
- Clean your filter(s) with filter cleaning solution

OTHER TIPS:

- Whenever you put chemicals into your spa, run the spa with the cover open for 20 minutes
- If you have well water, fill with a Clean Screen filter every time
- Change your paper filters annually. Tri-X filters could last up to 5 years
- Tri-X filters can be cleaned in dishwasher monthly

TO LOWER ALKALINITY, USE pH DECREASER
